IMPACT HIGHLIGHTS

Financial Management

Innovative Financial Management and analysis solutions that drive financial accountability and decision making. Supporting all phases of Planning, Programming, Budgeting and Execution (PPBE) and audit readiness.

Managed the PPBE process for an Office of the Secretary of Defense (OSD) client with a **budget of over \$2.8 billion**, maximizing mission impact across multiple defense appropriations including Operations and Maintenance (O&M), Procurement, and Research, Development, Test and Evaluation (RDT&E) .

Oversaw the development of current and future year forecasts to set accurate rates for Army Working Capital Fund (AWCF) Logistic Operations (LOGOPS) and Hardware programs, which conduct **over \$1 billion in customer orders annually** for the U.S. Army Communications-Electronics Command (CECOM).

Performed an average of **over 1,800 internal and external tests annually** to assess, identify, and correct deficiencies in CECOM's internal controls, supporting audit readiness and the Army's goal to achieve a clean audit opinion.

Acquisition Support

Cradle-to-grave federal acquisition lifecycle support for acquisition of goods, services, and construction around the globe. More than 90 DAWIA, FAC-C, and NCMA certified acquisition professionals on staff.

Executed **20,800 contract actions and obligations worth over \$13 billion** for Department of State goods, services, and construction, including contracts that supported diplomatic security in FY24.

Supported the implementation and adoption of a new contract and invoice management system, **enhancing accountability and transparency** of contract spend for a Defense Agency.

Data Analytics

Business Intelligence support from early-stage data source management to dashboard development and visualizations. Leveraging data and information to deliver access and insights that drive key organizational decisions.

Transformed extensive budget and execution data from Defense Agencies Initiative (DAI), using Power BI to develop clear visualizations and digital metrics that supported leadership as they **managed over \$11 billion in DoD funding** for a Washington Headquarters Services directorate.

Developed a machine learning model to sort cases for Department of State's Afghan Special Immigrant Visa Unit, **accelerating cases processed by 60% and eliminating a 50,000-case backlog**.

Developed a personnel dashboard that provides insight to leadership on vacancies, fill actions, and billet structure to enable **strategic human capital planning** for a Washington Headquarters Services directorate.
