

The Nakupuna Companies support Program Offices across the spectrum of mission-critical tasks that keep essential platforms and systems responsive to the needs of the warfighter. Leveraging our broad experience to augment Program Offices' unique administrative, logistical, budgetary, and strategic functions, Nakupuna provides efficiency while building innovative processes and structures that deliver lasting mission success.

**COMPREHENSIVE &
FLEXIBLE SUPPORT ACROSS
ALL PROGRAM OFFICE
OPERATIONS**

Program Management

Building capacity, enabling efficiency, and delivering value through data-backed, actionable strategies that mitigate risks, align stakeholders, and meet cost, schedule, and performance goals.

Administrative Support

Assembling effective teams of knowledgeable, resourceful, organized, and poised support personnel who integrate with our customers' goals and mission.

Acquisition & Contract Management

Applying a detailed understanding of acquisition processes to track and report CDRLs, assist with planning & procurement documentation, and ensure program compliance at every step.

Financial Management, Analysis & Execution

Budgeting, estimating, analyzing, and executing end-to-end financial management functions for large programs backed by proven experience with the PPBE process, financial systems, and cost estimating principles.

Audit Readiness & Internal Controls

Ensuring processes are documented and executed to build a culture dedicated to accountability and audit readiness.

Agile Recruiting

Rapidly staff teams to build momentum from day one

Flexible Approach

Quickly support changing staffing needs across labor categories

Tailored Innovation

Cutting-edge automation, data, and AI/ML custom-built to achieve specific mission goals

Experience with an Impact

NAVSEA PMS-317

Nakupuna delivers data-backed, innovative program office support activities for PMS-317 in acquisition and sustainment, working alongside product teams and engineers to deploy optimizations that drive mission readiness.

PMS-317 Professional Support Services Include

- PMO Support
- Strategic Planning
- Logistics and Supply Chain Support
- Financial Management
- Earned Value/Contract Management
- Admin/Executive Support

Spotlight: PMS-317 Sensor Analysis

Problem: PMS-317 was managing dense timeseries data across multiple sensor groups with a manual process that limited its data analysis capacity.

Approach: Nakupuna evaluated the use of **Robotic Process Automation (RPA)** to consolidate multi-gigabyte sensor extract files that would replace outdated data storage methods, as well as data visualization software already accessible to the client.

Solution: Through a custom Microsoft PowerBI application, Nakupuna delivered a tool that enabled PMS-317 to analyze dense timeseries data across multiple sensor groups. The tool can show side-by-side sensor comparisons within targeted timeframes—**streamlining ship performance analysis** and replacing a manual, Excel-based process.

Impact: Significantly improved data management and visualization capabilities of complex sensor data. Through interactive report dashboards, dynamic data noise filtering, and timeframe (data zoom) targeting, PMS-317 now has faster, easier access to critical multi-sensor analytics.

Defense Threat Reduction Agency (DTRA) Planning, Operations, and Advisory Services (POAS)

Nakupuna provides acquisition, program management, business operations support, analytics, **training**, exercise and readiness planning, IT support, and process improvement to assist DTRA with countering and deterring weapons of mass destruction (WMD), improvised threats and threat networks.

- Managed **13 subcontractors** and **100+ employees**.
- Onboarded **75 incumbent** personnel and **45 new hires**.
- Received **99.3% award fee** average across 7 evaluation periods.

NAVAIR Command Property Office (CPO) IDIQ

Nakupuna provides comprehensive program and logistics support across the NAVAIR Command Property Office and **8 Program Offices**. We also provide financial and IT support, as well as data analytics and automation capability.

- Implemented RPA tools saving **3,000+ hours of labor** and reducing reporting cycles to **under 72 hours**.
- Developed Microsoft PowerBI applications to replace manual data entry, **cutting processing time by 50%**.
- Created and deployed Navy ERP training videos on DoD networks, improving user proficiency and efficiency.

NAVSEA 04 Program Office Support

Nakupuna provides administrative, business financial management, data analysis, executive level coaching, business process engineering, logistics, **shipyard process and policy reviews**, and technical and engineering support—improving readiness by **increasing shipyard throughput**.

- Developed a new material readiness metric around scheduled work packages and required lead times.
- Developed a PowerApp that **flagged schedule risks 30% earlier**, improving maintenance predictability.
- Analyzed cannibalization requirements for upcoming shipyard maintenance, reducing the risk of schedule impacts.
